PROFESSIONAL SUMMARY

Computer Science student specializing in **Full-Stack Development and AI Engineering** with hands-on experience building scalable web applications, AI agents, RAG systems, and automation workflows. Proven competitive programmer with a strong foundation in algorithms and system design, seeking a Full-Stack / AI Engineer role.

TECHNICAL SKILLS

Languages: Python, C/C++, C#, JavaScript, TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs

AI / ML: LangChain, LangGraph, OpenAI, Gemini, Groq, Hugging Face, RAG, AI Agents, Prompt Engineering

Databases: PostgreSQL, MySQL, MongoDB, Convex

Vector & Infra: FAISS, ChromaDB, Pinecone, Docker

Tools: Git, GitHub, Linux, Postman

Competitive Programming: ICPC Regionalist | Codeforces Pupil | 300+ LeetCode Problems (~Rating 1200)

EXPERIENCE

Full-Stack Developer Intern (AI Integrations) — SKAFS International (Pvt) Ltd

Jan 2026 – Present

- Engineered full-stack applications with AI-powered workflows, integrating LLM-based chatbots, RAG pipelines, and multi-agent orchestration systems into production environments.
- Developed and deployed end-to-end AI agent systems using LangChain and LangGraph, enabling autonomous task execution with memory, tool use, and validation layers.

Full-Stack Developer — Freelance

2025

- Delivered multiple MERN and Next.js client projects including a full-featured food ordering platform and a healthcare management application with authentication and role-based access.
- Collaborated on a real-world music streaming application (Tswangi Music App), implementing API integration and building the frontend interface connected to backend services

PROJECTS

Advanced AI Agent System

LangChain · LangGraph · Groq · Streamlit

- Architected a ReAct-based multi-agent system featuring orchestration, persistent memory, and validation layers enabling complex, multi-step autonomous reasoning.
- Implemented hybrid RAG with live web retrieval to ground responses in real-time data; built an interactive Streamlit UI with source citations and full agent trace visibility.

AI Email Automation Platform

LangChain · OpenAI · Vector DB

- Built an end-to-end email automation system that parses customer support emails, retrieves relevant context via RAG from a company knowledge base, and generates accurate draft responses.
- Integrated a human-in-the-loop approval workflow, ensuring all AI-generated replies are reviewed before delivery, reducing response time while maintaining quality control.

Slack Clone

Next.js · TypeScript · Convex

- Developed a real-time messaging platform with workspace and channel architecture, implementing role-based permissions, live synchronization, and responsive UI.

Fast-Food Restaurant Platform

MERN Stack

- Built a full-stack food ordering application featuring JWT authentication, dynamic menu management, order tracking, and an admin dashboard for restaurant operations.

EDUCATION

Bachelor of Science in Computer Science — PUCIT, University of the Punjab

Expected 2028
