Soman Abbasi

+92 348 1822987 • mssabbasi306@gmail.com
github.com/SomanAbbasi • PU Lahore, Pakistan

Computer Science student with expertise in full-stack development, data structures, and database systems. Proven problem-solving ability through competitive programming and real-world projects. Seeking an Associate Software Engineer role to build scalable and efficient software solutions in dynamic environments.

EDUCATION

PUCIT, University of the Punjab — Lahore, Pakistan *2024 – 2028*
Bachelor of Science in Computer Science | CGPA: 3.78

SKILLS

- **Languages:** Python, C/C++, C#, JavaScript, TypeScript
- **Frontend:** React, Next.js, HTML5, CSS3, SASS, Tailwind CSS, Electron
- **Backend:** Node.js, Express.js, Flask, FastAPI, ASP.NET Core (.NET)
- **Databases:** MySQL, Oracle, MongoDB, Convex Database
- **Competitive Programming:** ICPC Regionalist · Codeforces (Pupil) · LeetCode 500+ problems (~1800 rating)

EXPERIENCE

Full-Stack Freelance Developer *2026 – Present*
Remote

- Delivered MERN / Next.js web applications for small clients, including food ordering and hospital websites.
- Collaborated directly with clients to gather requirements, iterate on designs, and deliver high-quality solutions.

PROJECTS

Fast-Food Restaurant Platform *MERN Stack*

- Built a production-ready food ordering platform with authentication, cart management, and order tracking.
- Created an admin panel with full CRUD for users, orders, menu items, and categories.
- Designed a responsive UI with search, filtering, and persistent cart functionality.

Slack Clone — Real-Time Collaboration App *Next.js · TypeScript · Convex DB*

- Engineered a real-time chat platform with multi-workspace and channel-based communication.
- Implemented direct messaging, role-based access control, file sharing, and live data synchronisation.
- Built modular, reactive architecture with Convex backend to handle concurrent users at scale.

Hospital Website with SEO Optimisation *Next.js · TypeScript [Client Project]*

- Developed a high-performance, SEO-optimised site for a medical facility with structured content architecture.
- Implemented dynamic doctor profile pages with SEO-friendly routing and schema-based structured data.
- Optimised for search engine indexing, improving visibility on Google Search and Maps.

Weather Monitoring Application *Python · Flask · React.js*

- Built a full-stack weather monitoring dashboard with real-time data fetching and interactive charts.
- Implemented real-time data fetching and clean UI design for user-friendly interaction.

COMPETITIONS & HACKATHONS

ICPC Regional Contest *2026*

- Achieved regional ranking, demonstrating strong problem-solving and engineering skills.
- Collaborated in a team to design efficient, scalable solutions using Python and C/C++.

Calico — Gold Medalist *2025*

- Awarded Gold Medal at Calico competitive programming contest.

ACHIEVEMENTS

- LeetCode — 500+ problems solved, contest rating ~1800.
- Codeforces — Pupil rank, consistent performance across rated rounds.
- CGPA 3.78 / 4.0 — Dean's academic recognition (ongoing).
